

Sleep essence

When Sleep Matters

Advanced Sleep Technology

Designed specifically with you in mind

Our sleep systems are a real science

Hospitals know very well that a good nights sleep is key to a speedy recovery. They have long since realised that sleeping in a raised position rather than lying flat, promotes circulation, can relieve pain, reduces pressure points on the body

Nobodys wants a hospital style bed at home so the beds are designed to suit all homes Grand and not so Grand. There is a bed size for every requirement from a single to a whopping California dual king single

Vibrational Massage Therapy

Gentle Massage therapy is included in all our beds to assist with improving blood circulation and stimulating lymphatic drainage. Massage can be started with a timer and independent control of the back and leg areas.

Support, Comfort and Hygiene

Months of research went into providing the most important element of any bed - The Mattress. After many discussions with health care professionals, Surgeons, Chiropractors and Physiotherapist the answer was a medium firm mattress to ensure the correct posture is maintained as well as perfect skeletal alignment.

Significant trials were undertaken with factories to arrive at the best balance of supporting foam as well as comforting memory foam for the top layer. The design team also added a zip cover that can be easily removed and is machine washable ensuring the best level of hygiene.

The bed will adjust to over 1,000 positions to assist with positional pain relief and comfort

All adjustments are made from the wireless remote control or from your smart phone or tablet

The standard bed range is available in all sizes

- ✓ Single
- ✓ Wide king single
- ✓ Double
- ✓ Queen
- ✓ Split Queen
- ✓ Split King
- ✓ California Split king

Offers pain relief and support
for the lower spine

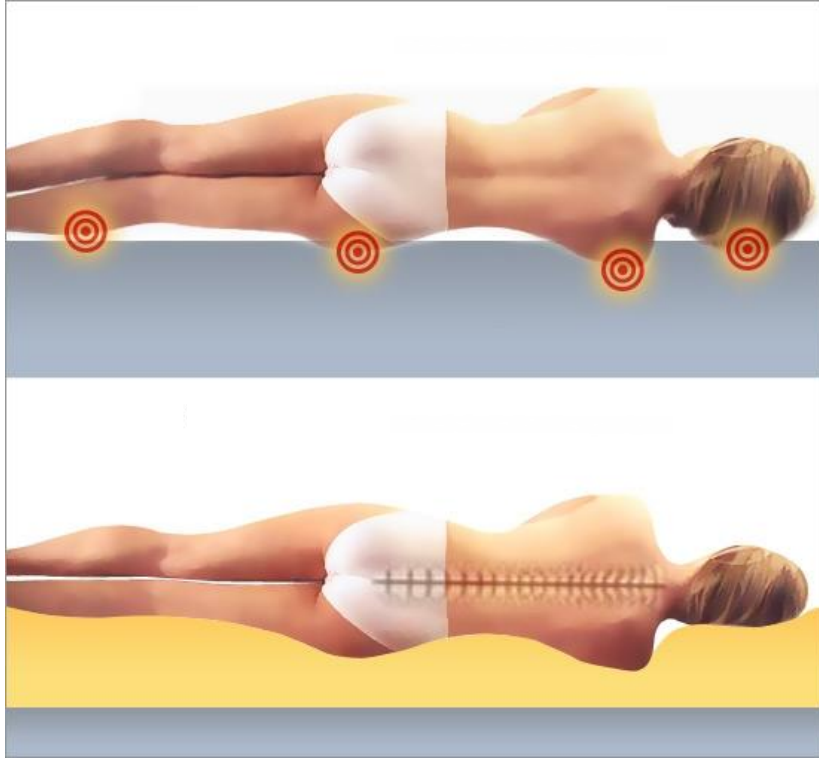

All adjustments can be controlled
by the wireless remote control or
through your smartphone or
tablet with the app available in
Android and Apple store

The Best Mattress You Can Buy

We spend one third of our lives in bed. Many people underestimate the importance of the quality of the mattress and the features needed to ensure our bodies get the correct support to maintain the alignment of the spine

With Inner spring mattresses it is almost impossible to support every curve of our body leading to increased pressure on the joints, impaired blood circulation and risk of body sores.

Pressure sensitive memory foam mattresses spread the weight of the entire body over the length of the mattress supporting the muscles, allow great blood flow and correct spinal alignment.

What makes our Mattresses different?

- ❖ *Medium Firm Dual Layer Memory Foam Mattress*
- ❖ *Unique Machine Washable Quilted Cover*
- ❖ *High Quality Long Lasting Visco Foam*
- ❖ *Dust Mite Resistant*
- ❖ *Anti Allergenic*
